

Team Name: MaNiJo

Team Member's Name: Matt Holden, Nick Ricci and Jordan Bogoslowski.

Business Opportunity/Problem:

This application would serve the purpose of allowing a user who is holding a yard sale to advertise to a broader audience.

This application will also allow a user a centralized place to track and plan yard sale for both sellers and buyers.

Describe who your users will be: Any person that will be holding a yard sale and yard sale enthusiasts.

High Level User Requirements:

Posting and searching yard sale dates, locations, times and notes.

User accounts with authentication.

Allowing users who are searching for yard sales to map out the best possible route to each location using google API.

User profiles that allows messaging and email notifications.

Technology that will be used: HTML, CSS, JS, jQuery, AWS, JSON, Bulma

High Level Database Architecture: Undecided.
